The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/589,714	Applicant(s) KNOP, VOLKER	
	Examiner MARIANO SY	Art Unit 3657	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Applicant's election of Group I, claims 11-18 in the reply filed on May 28, 2009 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. The disclosure is objected to because of the following informalities:

Page 13, line 11 "bleeder screw 30" should be --bleeder screw 31--.

Appropriate correction is required.

3. The abstract on page 14 should be limited to a single paragraph.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Halasy et al. (DE10320800) in view of Sawyer (US 4,218,811).

Halasy et al. teaches, as shown in fig. 3, a hydraulic brake equipped with a parking brake device including a brake housing in which at least two hydraulic pressure chambers 7, 13 are provided, with one pressure chamber being formed by a working

Art Unit: 3657

chamber 7 that is delimited by a brake piston, while the other pressure chamber is formed by an accumulator pressure chamber 13; and wherein brake fluid can be supplied through hydraulic port connection 8 simultaneously to both pressure chambers.

However Halasy et al. failed to provide a dual bleeder simultaneously bleeding the two pressure chambers.

Sawyer teaches, as shown in fig. 1, the use of a dual bleeder through bleeder valve aperture for simultaneously bleeding the two pressure chambers 20, 20.

It would have been obvious to one of ordinary skill in the art to provide the brake device of Halasy et al. with a dual bleeder for simultaneously bleeding the two pressure chambers, as taught by Sawyer, in order to effectively remove air or bubbles inside the two pressure chambers instead of providing each pressure chamber with individual bleeder so as to save cost.

Allowable Subject Matter

6. Claims 12-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
